## Furniture fitting solutions

## The joining that fits: Jerger

Joining elements made of steel and brass – a fiercely competitive market worldwide in which we have been successfully asserting ourself for decades now. Our recipe for success is **top quality** through **intelligent automation, high production flexibility** and **short delivery times**. We have built up an established clientele around the globe on the basis of these merits in combination with our **innovative power**. After all, fair prices, unbeatable quality and speed are more than just simply economical.

Our experience in many sectors makes us a specialist with a broad overview:

- construction industry
- furniture industry
- plastic industry
- automotive

We do what we can - in the truest sense of the word:

### Processing

- of free-cutting steel, brass an stainless steel
- with a diameter of 4.5 to 18 mm
- up to 120 mm long
- and of sectional material (e.g. square-headed or hexagonal)
